LMC Acquires and Cleans Up “Worst Eyesore on the Little Miami”, Wildlife returns soon after

On March 28, 2013 LMC acquired title to a 1.4 acre parcel upstream from Morrow (photo above right) in Warren County. With half a dozen semi trailers, abandoned vehicles, plastic barrels, broken concrete, several sheds and a large building overhanging the river LMC had its work cut out for it in bringing this “diamond in the rough” back to “gem” status.

Thanks to over 40 volunteers (see photo below) and an LMI contractor the 600 feet of riverfront is returning to a natural riverfront forest worthy of a National Wild & Scenic River and wildlife is already returning!

Thanks also to the Warren County Prosecutor’s office, County Building Department and Washington Township.

2013 Lower Little Miami Clean Sweep A Success!
Another 50 cubic yards of trash were swept from the riverbanks in 2013 including 250 tires. Many thanks to the teams from Rampke Markets, PSARA, Pepper Construction, HB Fuller and CH2M Hill for helping restore the natural splendor of the Little Miami.

Sustaining the River’s Future depends on you “Leaving Your Legacy, Naturally!”

As the Little Miami Conservancy celebrates its 47th anniversary, we look back over the decades of dedication by thousands of area citizens to protecting and restoring the river we all love. The challenge ahead is to sustain this great work into the coming decades by making a tax-deductible gift to LMC that will assure that this great dream is kept alive and well for future generations.

Please have a conversation with your family and financial advisor and see how a bequest or other donation to LMC can help expand the LMC Endowment Fund and sustain our conservation efforts for years to come.

KEEP IT QUIET Naturally!

Respect Wildlife, landowners and fellow outdoor visitors by keeping the Little Miami a place of unique quiet and natural solitude. AVOID YELLING and LOUD NOISES. THANK YOU!
